Steps to Create a new project in Matillion.					
Orchestration Job	1	AWS	SNS Message		
Transformation Job			SQS Message		
	2	Connectors --- Load	API Extract		
			API Query		
			Apache Hive Query		
			Apache Spark SQL		
			Azure Blob Storage		
			Database Query		
			Excel Query		
			Mongo DB query		
			RDS Query		
			S3 Load		
	3	Connectors --- Unload	Azure Blob Storage		
			Oracle Output		
			MS SQL server Output		
			RDS Bulk output		
			S3 Unload		
	4	DDL	Alter External table		
			Alter table		
			Create External table		
			Create stream		
			Create table		
			Delete table		
			refresh external table		
			SQL script		
			Truncate table		
	5	Flow	And		
			End failure		
			End success		
			If		
			OR		
			Retry		
			start		
	6	Iterate	File iterator		
			Fixed iterator		
			Grid iterator		
			Loop iterator		
			Table iterator		
	7	Messaging	Send Email		

# MASTER ETL WITH MATILLION IN JUST 30 DAYS
